

TENDER NOTICE

1. Background

Bakshi Ka Talab block in Lucknow district faces increasing challenges related to declining groundwater levels and irregular water availability, especially in community-level institutions such as Aanganwadi centres. These centres play a crucial role in child development, nutrition, and community welfare, yet often lack sustainable water management systems.

Rainwater harvesting (RWH) presents an effective, low-cost, and environmentally sustainable solution to recharge groundwater and ensure water availability. Implementing RWH systems in Aanganwadi centres will not only improve water security but also promote awareness about water conservation among the local community.

2. Objective

The key objectives of this project are:

- To enhance groundwater recharge in Bakshi Ka Talab area.
- To ensure sustainable water availability in Aanganwadi centres.
- To reduce dependency on external water sources.
- To promote water conservation awareness at the grassroots level.
- To develop a replicable model of rainwater harvesting for rural institutions.
- To improve hygiene and sanitation conditions in Aanganwadi facilities.

Nature of Work: Roof Top Rain Water Harvesting.

Place of Work: 25 AWCs in Block Bakshi ka Talab Lucknow.
